

Papendal (Olympic Village), 22.12.2015

We the Dutch National BMX Team are always looking for improvements/progress. We expect a lot of our own top athletes. We use the best of the best materials in the BMX world and at this point we don't make any concessions about quality because quality pays itself always back !!

Look this year at Niek Kimmann the NEW BMX World Champion 2015 and Jelle van Gorkom who achieved silver. Both men are cyclist on the highest level at the Elite men.

We came in contact with Marco Smeets from the firm Proff, distributor of the product Strike Hold. We use Strike Hold for quite some time now. We didn't expect that a product could have such a perfect multi properties. We experienced that he lubricates perfect for the chains "no dust sticks on it", the chains are running very smooth, it isn't sticky and lubricates perfect when it rains extreme (look this Year back at EC Messigny 2015 & WC Zolder 2015). In the past all other products clearly failed. We extracted this Year the BMX National European and the World Title and we hope next Year with Strike Hold and the perfect lubricated Meybo BMX bikes to try and to reach out for the Olympic Title 2016.

For us is Strike Hold as the Dutch National BMX Team really an added value where quality certainly really is demanded.

A personal anecdote from our main head mechanic:

"I the mechanic of the Dutch National Olympic BMX Team was very surprised how the product Strike Hold works. The product keeps the chain very clean from the outside and it operates inside the pivot points of the chain even under all weather conditions, it works very excellent. The product protects very good against water influences so it's also suitable for lubrication of the brake cables & the hinge points, the bearings of the bottom brackets and hubs. Strike Hold helps to run them lighter and allows for a longer service life. I experience it's even a perfect lubrication for the seatpost in order to prevent cracking without losing the clamping force.. Also our riders in the Dutch National BMX Team are very satisfied how the Strike Hold works and how ease it's to use."

We are very happy with the Strike Hold. We believe that the product also deserves a place of honor, for us it is a very definitely a NUMBER 1 product.

I can officially confirm that the Dutch National BMX Team (the Elite team and the Talent Team) are now using the Strike Hold from Marco Smeets the distributor, on there Meybo BMX bikes.
